JOINT LAND AVAILABILITY STUDY

CARMARTHENSHIRE COUNTY COUNCIL – 01ST APRIL 2007

ANNUAL REPORT CO-ORDINATED BY THE DEPARTMENT FOR THE ECONOMY AND TRANSPORT OF THE WELSH ASSEMBLY GOVERNMENT

1. INTRODUCTION

- 1.1 This is the latest report for the County of Carmarthenshire which came into being as a Unitary Authority on 1st April 1996. The current report published under Planning Policy Wales (PPW), issued in March 2002, presents the findings for the area at the base date of 01st April 2007, and updates the previous 2005 report
- 1.2 The report has been prepared by the Study Group in accordance with Planning Policy Wales and Technical Advice Note (TAN) 1. Planning Policy Wales has been amended in respect of the Housing Chapter by updated policy guidance issued through the Ministerial Interim Planning Policy Statement on Housing(MIPPS) 01/2006) which was issued in June 2006. A revised TAN1(W) was also published in June 2006). All future housing land availability studies carried out will now be undertaken with a April 01st base date each year.
- 1.3 Prior to the 1st of April 2006 the Study Group was co-ordinated by the Land Division of the Welsh Development Agency. Since that date the responsibility has transferred to the Department for the Economy and Transport of the Welsh Assembly Government. The Study Group includes the Unitary Authority, housebuilders representatives, housing associations, statutory undertakings and other bodies as appropriate.
- 1.4 The study involves discussions of individual residential land allocations and planning permissions undertaken on an area by area basis and includes consideration of the likely rate of progress in building on each site and an examination, where appropriate, of the problems inhibiting the provision of an adequate land supply.
- 1.5 The report which follows presents the agreed view of the Group involved in its preparation, and the comments comprising Part 3 of the report have been generally agreed by all participants. However any point of difference which have not been resolved through joint discussion are recorded as such and included within part 3.
- 1.6 A copy of the relevant section of Planning Policy Wales (PPW) as amended, together with TAN 1(2006), are appended at Annex 4.

2. PART 1: THE SURVEY

2.1 Requirements of Planning Policy Wales (as amended by MIPPS 01/06)

2.1.1 Paragraph 9.2.3 of Planning Policy Wales (as amended) states that local planning authorities must ensure that sufficient land is genuinely available or will become available to provide a 5-year supply of housing.

2.1.2 To be genuinely available, sites must satisfy various minimum criteria set out in TAN 1(2006).

2.1.3 As set out in TAN 1(2006), para 7.1.1 for sites to be included in the Joint Housing Land Availability Studies they must satisfy at least one of the following conditions :

- The grant of outline or full planning permission for residential purposes; or
- The land should be identified for residential purposes in an adopted development plan.

2.1.4 To allow the comparison of land available with the housing provision in the adopted development plan the sites are categorised as to their availability. The categorisation establishes when the development of a site or a portion of a site is likely to be completed. The allocation of a site to several categories indicates the rate at which development is expected to proceed.

2.1.5 The definitions of the categories adopted by TAN 1(2006) are as follows:

Sites under construction: Sites or the phases of sites, which are under construction (relating only to the area where building is in progress);

Category 1: Sites or the phases of sites where development can commence immediately, and which are likely to be completed within the first year of the study period;

Category 2: Sites or the phases of sites where development cannot commence immediately, but where the constraint on development is likely to be removed in time for dwellings to be completed within 5 years;

Category 2*: Sites which are capable of being developed within the 5 year period but which lie within the areas defined in paragraph 7.2.1 of TAN 1(2006), where market demand is such that development is unlikely to occur within 5 years.

Category 3: Sites or the phases of sites where either:

3(i) development is unlikely within 5 years by virtue of major physical constraints or other constraints as may be agreed by the Group; or

3(ii) development is unlikely to occur in the foreseeable future by virtue of major long term constraints.

2.1.6 The factors normally taken into account by the Group in assessing whether all or part of a site should be listed in Category 3(i) include planning, ownership, marketing, infrastructure, environmental and legal constraints as well as physical constraints.

2.1.7 Finally, TAN 1(2006) specifies that for sites or the phases of sites to be regarded as 'genuinely available' within a 5 year period (i.e. sites under construction, Categories 1, 2 and 2*) the following criteria should apply:

- the necessary infrastructure should be available or be expected to be available within the 5 year period. Consultation with appropriate public and private statutory undertakers and infrastructure providers may be appropriate;
- the Group agree that it is financially viable to develop the site

In addition, for Category 1 and 2 sites there should be a reasonable prospect of the site being sold for development where the land is not already owned by developers or a public body with its own firm plans for building. This should be based on a realistic assessment irrespective of current market conditions.

2.2 Method

2.2.1 The Group has met to consider all sites of 5 or more units, which satisfy the minimum criteria for being included in the study, to estimate the number of completions likely within the 5 year period, and to agree categorisation. Copies of the schedules listing the individual sites considered by the Group are published as part of the Main Report. The findings are set out in Table 1, which follows.

2.2.2 Small sites, accommodating less than 5 units, which by definition, have not been assessed individually in this Study, may make an important contribution to meeting housing needs. In recognition of this, as in previous studies, assessments of the likely completions on small sites appear as a footnote to Table 1 and have been taken into account in the UDP comparison exercise in Part 2 of the report.

2.2.3 Sites subject to Section 106 Agreements are now only to be included in the studies if they are allocated in an adopted development plan.

2.3 Additional requirements of TAN 1(2006)

- 2.3.1 A number of new data requirements set out in the new TAN 1(2006) guidance are incorporated into the 2007 round of studies. These include seeking to establish the level of completions in terms of:
- market and affordable housing units;
 - brownfield and greenfield land ;
 - by house type ;
 - sites affected by flood risk.
- 2.3.2 The Group has also been asked to consider how the future land supply position is likely to provide for future affordable housing provision, development on previously developed land and what anticipated level of provision is likely to come forward from sites subject to flood risk.
- 2.3.3 It is recognized that not all these factors will have a particular significance in each authority area but where such matters are considered to be relevant then a commentary or tabulation of results may be appropriate for inclusion in the study report.

2.3 FINDINGS

- 2.3.1 The five year supply of land in the County of Carmarthenshire as at 01st April 2007 is sufficient for 3714 dwellings,90% of which was expected to be provided on large sites. There are 370 dwellings under construction on large sites, 94% of which are being developed by the private sector. 1175 dwellings were completed during the 21 month period. (Private 98%,, Housing Association 5%). The small sites contribution to the total completions is at an estimated average annual rate of 77 units (this small site estimate is based upon submitted figures to UDP Inquiry).
- 2.3.2 Land sufficient for 6334 dwellings was identified on sites falling within Category 3(i) and land for a further 101 dwellings on sites in Category 3(ii).

PART 2: COMPARISON OF FUTURE HOUSING REQUIREMENTS WITH LAND SUPPLY

3.0 Introduction

3.1.1 The Development Plan for Carmarthenshire consists of the recently adopted Unitary Development Plan (UDP) 2001-2016 (adopted July 2006).

3.2 Basis of Comparison

3.2.1 The Carmarthenshire Unitary Development Plan 2001-2016 forms the basis for assessing the housing requirement in this study. .

3.3 Agreed Basis for Assessing Housing Land Requirements 2007-2012

3.3.1 The results of the 2007 Land Availability Study are summarised in Table A. The Table compares the total of effectively available housing land as agreed by the Group, with the anticipated housing requirements over the next five years.

3.4 Results of Comparison

3.4.1 The results of the 2007 Study show that in Carmarthenshire County as a whole there is a 6.4 year land supply.

TABLE A - CARMARTHENSHIRE COUNTY COUNCIL

**AVAILABILITY OF LAND FOR HOUSEBUILDING IN CARMARTHENSHIRE AS AT 01ST APRIL 2007
BASED ON CARMARTHENSHIRE UNITARY DEVELOPMENT PLAN 2001-2016**

	ADOPTED UNITARY DEVELOPMENT PLAN TOTAL HOUSE BUILDING REQUIREMENT 2001-2016	TOTAL DWELLINGS COMPLETED 30/06/2001 – 01/04/2007 (5.75 YEARS)	RESIDUAL NEED 01/04/07– 01/04/2016 (9.25 YEARS)	5 YEAR NEED 01/04/2007– 01/04/2012	ANNUAL NEED	TOTAL APPROVED LAND AVAILABLE BY 01ST APRIL 2007	TOTAL LAND SUPPLY IN YEARS
	a	b	c=a-b	d=c/9.25x5	e=d/5	f	g=f/e
CARMARTHENSHIRE	8,667	3304	5363	2899	579	3714	6.4 YEARS

NOTES:

Column f - includes allowance for small sites.

Column b – includes small site completions of 135 (77+58) units for the 21 month period 30/06/2005-01/04/2007 based on the UDP average rate of 77 units a years. Total completions on large sites over the 21 month period = 1175 units.

PART 3: COMMENTARY

4.1 Performance of the Building Industry

4.1.1 Table B below sets out the land supply position where compared with the average completion figures since 2001 in the County. The average annual completions have been 575 units which on the bases of the current available land would provide a 6.4 years supply. At present therefore the residual base and the past build comparison would provide the same indicative land supply position.

TABLE B

CARMARTHENSHIRE UNITARY AUTHORITY AREA

COMPLETION FIGURES FOR JULY 2001-APRIL 2007 (5.75 YEARS)

UDP	LAND SUPPLY	COMPLETIONS 7/01 - 6/07	5.75 YEAR ANNUAL AVERAGE	YEARS SUPPLY
CARMARTHENSHIRE COUNTY TOTAL	3714	3304	575	6.4

With only six years of the plan period gone, Tables B and C represent a 5.75 year annual completion figure.

4.2 Small Sites

4.2.1 It is important to note the contribution to the land supply provided by small sites, i.e. sites for fewer than five dwellings, which are not individually identified during the Study but which are particularly important in most parts of Carmarthenshire. The small sites allowance contributing to land supply in the 2007 study is based on the UDP average provision of 1162 units anticipated over the plan period. This equates to an expected 77 small site completions per annum.

4.2.2 In terms of the percentage contribution by small sites to the overall supply, by sub Area, Tables 2-4 show that this ranges across the sub areas of the County from a contribution of 8% in Llanelli, 13% in Carmarthen and 12% in Dinefwr. The overall contribution across the County equates to 10% contribution by small sites.

4.3 Land Available Beyond 5 Years - Category 3(i).

4.4.1 In addition to the land agreed to be effectively available within five years, the Study also assesses the amount of land committed for residential development on which dwellings are likely to be built, although not within

five years. Many sites included within the land availability studies are too large, or are being developed at too slow a rate because of market conditions, to be completely developed within 5 years. For example the many small, local, building firms often have landbanks reserved for activity well beyond five years. The residues of such sites have therefore been placed in Category 3(i) to reflect this phasing constraint of the housebuilding market, and this has become the common practice in these studies.

- 4.4.2 Other constraints such as legal, ownership and infrastructure may prevent a site from being developed, and these would similarly be classed as Category 3(i) sites. The regular monitoring of these constraints is an important part of these studies and a change in ownership for example may well result in land coming forward earlier than anticipated.
- 4.4.3 In Carmarthenshire there is a large amount of land identified in Category 3(i) on sites of 5 or more units. This is of particular significance when considering both further releases of land through grant of planning permission and the housing allocations in the UDP. These sites need to be examined in detail where they do not represent phases of earlier development as their future potential contribution is likely to be critical to the maintenance of a five year land supply. All sites will be reviewed as part of the LDP process currently underway.

4.5 An Appraisal of Land Availability by Sub – Area - Summary

4.5. Carmarthen sub Area

- 4.5.1 Carmarthen has land available, on large sites, for 1130 units. At the base date of the study 9% of these were under construction. A further 1909 units were categorised in 3(i). Completions in the Carmarthen sub area on large sites amounted to 326 units between 01st July 2005 and 31st March 2007
- 4.5.2 The major development sites are concentrated in Carmarthen Town where land to accommodate 158 units (144 Private, 14 Public) is available representing around 14% of the total land supply on large sites in the Carmarthen Sub Area.
- 4.5.3 There were 128 completions on large sites in the Carmarthen town area. Other settlements in the Carmarthen sub area where significant housing completions have taken place over the 21 month period to April 2007, were at Cefneithin (12 units) Cwmann (17 units) Drefach (12 units)

Llanpumpsaint (10 units) Ferryside (12 units), Gorslas (16 units), St Clears / Pwlltrap (26 units) and Whitland (34 units).

4.5.4 The main settlement areas identified as having land available for private sector housing development over the next 5 years, other than Carmarthen (144 units), are at Cwmann (40 units), Porthyrhyd (42 units), Pendine (44 units), Llanybydder (57 units) Whitland (118 units), and at St Clears / Pwlltrap (170 units).

4.6 Dinefwr Sub Area

4.6.1 The 2007 figure of 614 units available is an increase to the 2005 figure of 492. The number of units in Category 3(i) has increased from 595 units in 2005 to 1534 in this year's study. A total of 227 units were completed on large sites in the Dinefwr sub area between 01st July 2005 – 31st March 2007.

4.6.2 There were 50 completions on large sites in the Ammanford town area. Other settlements in the Dinefwr sub area where significant housing completions have taken place over the 21 month period from mid 2005 to April 2007 were at Llandybie (39 units), Llandeilo (49 units) and Penygroes / Gorsddu (52 units)

4.6.3 The southern settlements of the sub area including Ammanford (172 units), Glanamman/Garnant (87 units), Penygroes/Gorsddu (123 units) provide the majority of the identified future land supply on large sites. Llandeilo (65 units) one of the major settlements in the more rural Central and Northern parts of the sub area provides the other main area with available housing land on larger sites.

4.7 Llanelli sub Area

4.7.1 The number of units available on large sites in Llanelli stands at 1564 units. A total of 622 units were completed on large sites within the Llanelli sub area between 01st July 2005 – 31st March 2007.

4.7.2 There were 347 completions on large private sites in the Llanelli Town area. Other settlements in the Llanelli sub area where significant housing completions have taken place over the 21 month period to April 2007, were at Burry Port (58 units), Kidwelly (28 units), Tumble (29 units), and Tycroes (36 units).

4.7.3 58 % of the identified five year land supply on large sites is in the town of Llanelli itself (843 units), with the remaining areas spread through the sub area with significant areas of land available to the west in Kidwelly (93 units), Pembrey (86 units) and Burry Port (152 units), and to the north and east in Hendy (40 units) and Trimsaran (63 units).

7. ISSUES OF CROSS UNITARY AUTHORITY SIGNIFICANCE

7.1 Brownfield / Greenfield

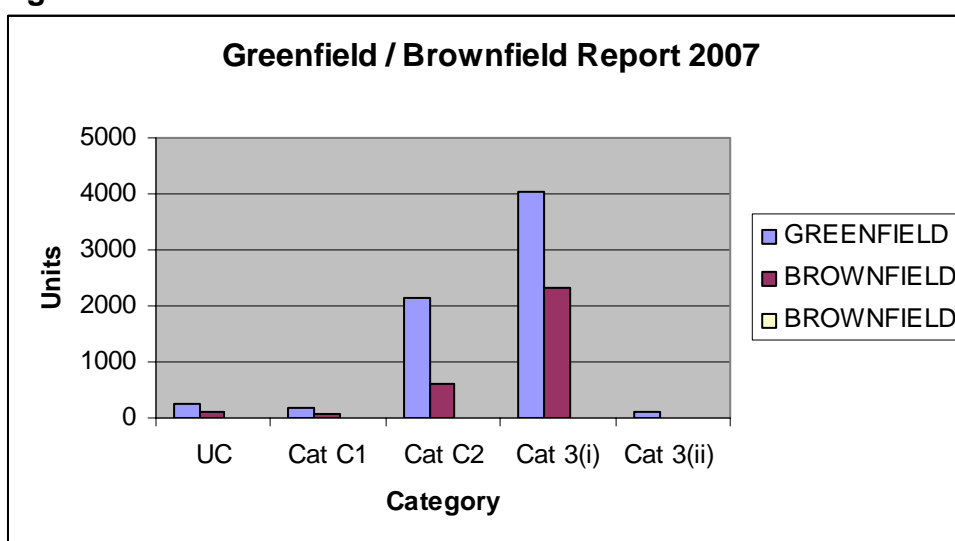

7.1.1 Recent Government guidance advocates the development of brownfield sites for housing. The Group noted the more complex relationship between the demand for housing and the location of previously developed sites. Brownfield sites are not always situated in areas of high housing demand and promoting greenfield development in these areas can be a contentious issue. The HBF noted that Government guidance promotes a range and choice of housing sites and the allocation of brownfield land for housing development must be a viable option.

7.1.2 The Group agreed that there is a danger in the concept of sustainability, which incorporates brownfield development, being defined too narrowly. It is important that other issues are weighed against the benefits of developing on brownfield land, including housing demand.

7.1.3 The Group also noted the complexity surrounding the definition of brownfield sites. For example, greenfield sites, which have previously been reclaimed, were once defined as brownfield sites. However the definition of previously developed land is that set out in Planning Policy Wales (as amended) –see Figure 2.1 and that now forms the basis for this data provision.

7.1.4 A site by site breakdown of the Brownfield/Greenfield split for Carmarthenshire is available as part of the information collected and a summary table is produced at Figure 3 below for reference purposes.

Figure 3

7.2 Affordable Housing

- 7.2.1 In accordance with the revised TAN 1 guidance the level of completions of affordable housing units is required to be evidenced in these studies together with the estimated contributions which are likely to come forward over the next five years. Where definitive information is available eg through signed Section 106 agreements for delivery then these have been taken into account. Where no such information is available but policy requirements are likely to inform negotiations on future delivery of affordable housing units in the County then an estimate has been made and has been included in the Table set out at Annex 6. Appropriate caveats have been included where no definitive information is available to justify the estimated contribution included. Affordable units are defined in accordance with the definition set out in TAN 2 “Planning and Affordable Housing” (2006).
- 7.2.3 Low cost market housing is not included in the TAN 2 definition of affordable housing but where information is available then the contribution from this source has also been incorporated in the data collected.
- 7.2.4 A Table of affordable housing contributions in the County is included at Annex 6. There have been 67 actual completions of affordable housing shown in this study . The estimated level of future affordable contribution for the period 2007-2012 in Carmarthenshire is 349 units over the next five years, with the additional estimated contribution in future years depending on the negotiated contributions achieved.

5. **CONCLUSIONS**

- 5.1 The Study indicates that on the basis of the recently approved Unitary Development Plan requirements for Carmarthenshire , the agreed housing land supply would provide land for a further 6.4 years of development.
- 5.2 As indicated in Tables 1-4 development of sites for fewer than five dwellings remains an important component of housing supply in the County. Small sites account for an estimated 10% of the overall land supply in Carmarthenshire. This is an estimate it is based upon the figures submitted to the recent UDP Inquiry. The Council will endeavor to evidence the small sites contribution through monitoring of actual levels of completions but this will take time to build up an accurate database and require resources.

 Market and Affordable Housing contribution
 Actual completions and
 Anticipated Affordable Housing contribution **over next five years**

*The Carmarthenshire Unitary Development Plan sets out the affordable housing policies for the borough. The policy is to negotiate affordable housing on sites over 10 units in urban areas and over 5 units in rural areas. On sites that meet the criteria a 20% affordable housing target will be the starting point for negotiations.
